The Seminole Soil and Water Conservation District is not supported with federal, state or local revenues. We now depend on the support of the community and grants to continue our work in Seminole County.

In the past we have received County funding. But due to budget restraints, funding was eliminated.

We hope you will consider supporting us with volunteer hours, with your expertise or with your financial support.

Also keep an eye out here for the fundraisers we are doing to raise money for the Seminole Soil and Water Conservation District's programs.

Please call any of our supervisors to talk about how we can work together.
